

Polyester Film Tape With Silicone Adhesive

Polyester film is coated with high temperature silicone pressure sensitive adhesive. Aggressive adhesion, high temperature resistant characteristics. Used for high temperature powder coating protection, motor insulation, transformers and various kinds of coil winding, etc.

Composition

Feature

- ◇ Polyester film as carrier, high temperature resistance, good insulation performance;
- ◇ Silicone pressure sensitive adhesive, aggressive adhesion, high temperature resistant;
- ◇ Surface protection without any residue.

Application

- ◇ Protection for powder coating;
- ◇ Transformers, motors, capacitor coil insulation protection, wrapping and packing ;
- ◇ Glass installation.

Article	Parameter
Type of Adhesive	Silicone
Total Tape Thickness/mic	60
Color	Green
Carrier	Polyester Film
Adhesion Strength/N/25mm	≥6
Initial Tack/mm	<60
Holding Power/h	≥48
Temperature Resistance	-73° C~220°C
Insulating Voltage/KV	≥5
Insulation Rank	F
